

CITY OF BAY ST. LOUIS
PROJECT STATUS REPORT
JUNE 2, 2015

1. HARBOR UPDATE – Structural design of wave screen wall is 90% complete. Working with multiple manufacturers and suppliers for cost estimating of the project components.
2. OST SIDEWALK PROJECT – PSE packages still under review at MDOT in Jackson.
3. The City Engineer is finalizing cost estimation for City Wide Capitol Improvements Bond Initiative, coordinating with Council Members on Ward specific projects. Also, assisting with BSL Harbor warranty items and MDA grant application requirements.
4. MAIN STREET SEWER – The repair contractor, DNA, has completed the paving portion of the repair. The city was not notified in sufficient time to observe the paving, so DNA has been required to provide additional information regarding the paving process for our review. Namely, asphalt mix design, core sample to verify thickness of asphalt placed and warranty statement.
5. BSL DRAINAGE & ROADWAY REVIEW – a preliminary report has been completed and submitted on the drainage and roadway issues in Riverview Subdivision area and Jason is currently working on cost estimates for improvements in this area.
